

Dunsirn Partners Sells Operon Systems to Management Team

Greenville, WI - July 18, 2014 — Dunsirn Partners announces the sale of Operon Systems, LLC to Troy Dunsirn, president of Operon, and Duane Dunsirn, advisor to the president. Operon, previously a division of Dunsirn Partners, will now operate fully under its management team.

Headquartered in Greenville, Wis., Operon provides productivity tools and systems for manufacturing. The transfer of ownership is a strategic move by the firms to position Operon for growth and further develop their customer solutions. Business will continue as normal during the transition, and Operon customers will notice no interruption in service.

“We are excited to take Operon to the next level,” said Troy Dunsirn. “Having direct ownership of the business provides complete alignment of our interests and of our customers. Dunsirn has provided the baseline and now we are in a strong position to continue our growth.”

“Troy has done an excellent job moving Operon from a startup software company to a strong contender in the manufacturing MRP space,” said Brian Dunsirn, CEO and founder of Dunsirn Partners. “The company is well positioned to leverage multiple opportunities for growth by providing customer centric solutions.”

About Dunsirn Partners

Dunsirn Partners LLC specializes in achieving long-term growth and profit potential for mid-size manufacturing, distribution and packaging companies. By combining capital, productivity tools and management resources, Dunsirn Partners takes a broad-spectrum approach to business building.

About Operon Systems
